RADEN MUHAMMAD FARREL KUSUMAWARDHANA

Bandung, Jawa Barat | +62 821 1864 3794 | farrelkusumah24@gmail.com

ABOUT ME

IT- focused developer with a background in Electrical Engineering, experienced in frontend development and manual QA. Comfortable working with React and Next.js for building user interfaces, while also handling manual testing, test case validation, and bug reporting. Detail-oriented, adaptable, and used to collaborating with cross-functional teams.

WORK EXPERIENCE

PLABS.ID

Frontend Developer | Jun 2024 - Jun 2025

PLABS.ID - Warehouse Management System

- Developed a warehouse management dashboard for stock opname and inventory monitoring
- Built dynamic warehouse visualizations to represent stock positions and operational layouts in real time
- Implemented frontend features including UI development, API integration, form validation, and state management
- Used Next.js, Tailwind CSS, React Hook Form, Zod, React Query, and customized ShadCN components
- Ensured responsive and performant UI across different screen sizes
- Optimized API calls and rendering performance using React Query
- Maintained clean and efficient component structure for better performance
- Participated in product discussions and feature planning as this system is an internal product under active development at PLABS.ID
- Collaborated with team members to refine dashboard workflows and improve usability for warehouse operations

Tawada Healthcare – Business Trip Claim & Reimbursement Dashboard

- Built a full-featured dashboard for business trip claims and reimbursements
- Managed end- to- end frontend development: UI slicing, API integration, form handling, and state management
- Utilized React, Next.js, Tailwind CSS, React Hook Form + Zod, React Query, and customized ShadCN UI components
- Ensured responsive and performant UI across different screen sizes
- Maintained clean and efficient component structure for better performance

- Collaborated with backend engineers, UI/UX designers, and DevOps for seamless integration and deployment
- Conducted manual testing for business trip claim and reimbursement features
- Validate user flows, edge cases, and form behavior before release
- Reported bugs and inconsistencies during development cycles

PLABS.IO – AI-based Robotic Hardware System
- Developed an AI- powered robotic system with Gemini AI integration for command- driven operations
- Created an interactive interface with a display screen for real-time configuration and feedback
- Integrated a camera module for visual perception, enabling navigation and task execution
- Designed and programmed core functionalities: command processing, sensor integration, and output visualization

Cretivox – Company Profile Website
- Implemented complex animations using GSAP to enhance storytelling and user engagement
- Integrated custom animation sequences with Next.js and SCSS for a polished, immersive experience
- Optimized animation timing and performance for smooth interactions across devices
- Improved the website’s overall aesthetic and interactivity, m
